

-- Oracle

1. For event requests, list the event number, event date (*eventrequest.dateheld*), and count of the event plans. Only include event requests in the result if the event request has more than one related event plan with a work date in December 2013.

```
SELECT er.EventNo,  
       er.DateHeld,  
       COUNT(ep.PlanNo) as PlanCount  
FROM EventRequest er  
INNER JOIN EventPlan ep  
ON ep.EventNo = er.EventNo  
WHERE TO_CHAR(ep.WorkDate, 'MM-YYYY') = '12-2013'  
GROUP BY er.EventNo, er.DateHeld  
HAVING COUNT(ep.PlanNo) > 1
```
