

-- ORACLE

3. SELECT * FROM ResourceTbl WHERE Rate BETWEEN 10 AND 20 ORDER BY Rate;

The image shows a 'Script Output' window from a database client. It contains the results of an SQL query. The window has a title bar 'Script Output x' and a toolbar with icons for undo, redo, save, print, and refresh. A status bar at the top right indicates 'Task completed in 0.14 seconds'. The query results are displayed in a table with three columns: RESNO, RESNAME, and RATE. The data is sorted by RATE in ascending order. Below the table, it states '6 rows selected'.

RESNO	RESNAME	RATE
R100	attendant	10
R102	usher	10
R105	food service	10
R104	janitor	15
R101	police	15
R103	nurse	20

6 rows selected
